[99.1](#) Press Release issued by Gladstone Investment Corporation, dated April 11, 2017.

Gladstone Investment Increases Monthly Cash Distributions to Common Stockholders and Announces Cash Distributions for April, May, and June 2017, Including Supplemental Distribution to Common Stockholders

MCLEAN, Va., April 11, 2017 (GLOBE NEWSWIRE) -- Gladstone Investment Corporation (NASDAQ:GAIN) (the “Company” or “GAIN”) announced today that its board of directors declared the following monthly cash distributions to preferred and common stockholders, increasing distributions to common stockholders by more than 2%.

The Company also announced it will pay a supplemental distribution of \$0.06 per share to holders of its common stock in June 2017. In this regard, the Company anticipates paying semi-annual, supplemental distributions each fiscal year, with the June 2017 payment being the first payment in fiscal year 2018. These payments are generally expected to be primarily made from undistributed net capital gains, but may also be made from undistributed net investment income, which the Company anticipates it will continue to generate in the future. The Company’s board of directors will evaluate the amount and timing of additional, semi-annual, supplemental distributions in future periods.

GAIN provides debt financing to portfolio companies that produces interest income, which is generally the primary source of its monthly run-rate distributions on its preferred and common stock. Undistributed net investment income represents income that has not yet been paid out to shareholders and which was largely generated from other income. Other income primarily consists of success fees from the Company’s debt investments, which are typically generated upon exit, and dividend income related to its equity investments. As a result of GAIN’s significant equity investments, it can earn meaningful amounts of dividend income and realized gains upon exit.

GAIN’s strategy contemplates the sale of its portfolio companies to realize gains on its equity investments and to generate other income, in the form of dividend income and success fees, upon exit. While the timing of exits is often unpredictable, the Company believes it is at a stage in its life cycle where it is prudent to reward holders of its common stock by making a supplemental distribution from undistributed realized gains and net investment income.

The Company plans to continue its monthly distributions to holders of its common stock at the new annual run-rate of \$0.77 per share, which it will seek to increase as it grows its assets and increases its net investment income.

Common Stock: \$0.064 per share of common stock for each of April, May, and June 2017, and a supplemental distribution of \$0.06 per share of common stock for June 2017, payable per the table below. The Company has paid 141 consecutive monthly cash distributions on its common stock.
